Portfolio: <https://naulia.vercel.app> | LinkedIn: <http://linkedin.com/in/nurritzkyta-aulia>

SUMMARY

Final-year software engineering student with a strong technical foundation in web and system development and hands-on experience in project and product delivery. Demonstrated capability in project coordination, requirement analysis, Agile execution, and risk tracking, bridging business needs and engineering implementation to support timely, on-scope system delivery.

EDUCATION

IPB University College of Vocational Studies

Bachelor of Applied Science (B.App.Sc), Software Engineering Technology
GPA: 3.75/4.00

Bogor, West Java

Expected, July 2026

SMKN 26 Jakarta

Network, Informatics, and Application System
Report Average: 86.67/100

East Jakarta, Jakarta

2018-2022

WORK EXPERIENCES

PT. Digdaya Duta Digital

System Development Intern

Jakarta, Indonesia

July 2025 – December 2025

- Delivered a new OTT platform system within a 5-month timeline, completing 3 core transaction and management modules by translating product requirements into structured technical tasks and coordinating backend, frontend, and QA teams.
- Enhanced system architecture and code implementation through modular backend API development using Laravel, improving maintainability and cross-module compatibility by up to 80% based on reduced code duplication and standardized service layers.
- Improved development performance and release stability by monitoring technical risks and database performance across sprints, minimizing implementation delays and post-release issues.
- Maintained delivery alignment with agreed milestones through proactive progress tracking and early escalation of blockers across development cycles.

Google Developer Group on Campus IPB

Core Team - Product Development & User Experience

Jakarta, Indonesia

January 2025 – October 2025

- Planned and facilitated a single product development session for 20+ GDGoC IPB members, introducing Agile workflows, requirement analysis, and delivery fundamentals.
- Led hands-on exercises on user story writing, lightweight PRDs, and wireframing, helping participants reduce requirement ambiguity during implementation.
- Supported participants' execution readiness by clarifying the linkage between planning artifacts and development activities.

PT. Bangun Sinar Indonesia (BSI PRO)

Product Manager Intern

Jakarta, Indonesia

August 2024 – January 2025

- Delivered an Outsourcing Management Platform used by 100+ users within a 6-month timeline, coordinating planning, requirement gathering, sprint execution, and delivery across 16 Agile sprints with cross-functional teams.
- Led product definition for 5 core modules (attendance, reporting, work order, and job checklist), ensuring end-to-end alignment from requirements to implementation.
- Developed and maintained end-to-end product artifacts including BRD, PRD, user stories, acceptance criteria, UML diagrams, and AS-IS / TO-BE process flows, reducing development rework.
- Conducted 2 UAT cycles across different projects, collaborating with business and operational teams to validate functionality and workflow readiness prior to release.

- Monitored sprint progress using Jira, prepared structured delivery status reports, and surfaced blockers early to support timely issue resolution and minimize delivery risk.

Institute for Information Management and Digital Transformation IPB
UX Researcher

Bogor, Indonesia
January 2023 – March 2023

- Conducted 2 user interview sessions with 5 stakeholders, translating qualitative insights into actionable requirements that informed design decisions for 3 key features.
- Executed research activities across 2 research and validation cycles, supporting system design refinement and feature prioritization during a 3-month research phase.
- Produced structured artifacts including user journey maps, UML diagrams, and low-fidelity wireframes, reducing requirement ambiguity and improving development readiness.
- Collaborated with product, design, and technical stakeholders to align user needs with business priorities and technical constraints.

ADW Consulting
Web Developer Intern

Jakarta, Indonesia
March 2021 – May 2022

- Supported the delivery and ongoing maintenance of 2 client websites over a 15-month engagement by resolving minor and major issues across development and staging environments, ensuring release readiness prior to production deployment.
- Conducted issue analysis, prioritization, and validation for reported defects, contributing to enhanced system stability and more controlled feature rollouts during iterative development cycles.
- Collaborated with cross-functional stakeholders to perform root-cause analysis and implement preventive resolutions, reducing recurring issues and mitigating delivery and implementation risks.

HONORS AND AWARDS

2nd Winner Web Programming Competition INV FEST X ISF 9.0	2025
Awardee Amarthya STEAM Fellowship Program (Scholarship)	2024
2nd Winner National Business Idea Competition PIONEERS 3.0 HIPMI PT UGM	2024
3rd Winner National UI/UX Design Competition Compsphere, President University	2023
1st Winner National English Speech Competition Vetionday IPB College of Vocational Studies	2023

SKILLS

- **Project Management & Business Analysis:** Project Management, Agile, Scrum, Sprint Planning, Project Progress Monitoring, Status Reporting, Milestone Tracking, Risk and Issue Identification, Escalation and Mitigation, Scope Control, Business and Requirement Analysis, BRD, PRD, User Stories, Acceptance Criteria, UAT Planning and Coordination, Business Process Mapping (AS-IS, TO-BE)
- **Technical Skills:** Laravel (PHP), HTML, CSS, JavaScript, Version Control (Git, GitHub, GitLab), TALL Stack, RESTful API, System Architecture Basics, Development and Staging Environments, Bug Tracking and Resolution
- **Tools:** Jira, Trello, Asana, Microsoft Project, Notion, Miro, Google Workspace (Docs, Sheets, PPT), Figma
- **Soft Skills:** Cross-functional Team Coordination, Stakeholder Communication & Alignment, Technical–Business Translation, Delivery Ownership & Execution Focus

PUBLISHED WORK

- DJTechno Journal Vol. 6 No. 2 (2025): Digital Platform for Hydroponic Education & E-Commerce using Business Intelligence
- JATI Journal Vol. 9 No. 1 (2025): Black Box Testing Implementation for Website Functional Evaluation
