

NURRIZKYTA AULIA HANIFAH

<http://linkedin.com/in/nurritzkyta-aulia>

Dept. of Software Engineering Technology IPB University, Bogor, Indonesia 16128

SUMMARY

Passionate about turning ideas into actionable products, I bring hands-on experience leading cross-functional teams and shaping digital platforms from concept to launch. Skilled in Agile, roadmap planning, and user-centered research, I deliver solutions that balance business goals with user needs. Driven to create impact, I thrive at the intersection of strategy, design, and execution.

IPB University College of Vocational Studies

Bachelor of Applied Science (B.App.Sc), Software Engineering Technology

GPA: 3.71/4.00

Bogor, West Java

Expected, July 2026

26 State Jakarta Vocational High School

Network, Informatics, and Application System

Report Average: 86.67/100

East Jakarta, Jakarta

2018-2022

RELATED PROFESSIONAL & ORGANIZATIONAL EXPERIENCE

PT. Digdaya Duta Digital

Backend Developer Intern

Jakarta, Indonesia

July 2025 – Dec 2025

- Developed and maintained backend services and APIs using Laravel/PHP to support core product features.
- Optimized database queries and structures, improving system performance and reliability.
- Collaborated with frontend, QA, and product teams to clarify requirements and deliver features efficiently.

Google Developer Group on Campus IPB

Core Team - Product Development & User Experience

Jakarta, Indonesia

January 2025 – October 2025

- Supported planning and facilitation of product development sessions, enabling members to understand product management fundamentals, requirement analysis, and agile workflow.
- Reviewed case studies and provided guidance on creating user stories, simple PRD, and wireframes to strengthen team competency.

PT. Bangun Sinar Indonesia (BSI PRO)

Product Manager Intern

2024

Jakarta, Indonesia

August 2024 – January

- Led end-to-end delivery of an Outsourcing Management Platform used by 100+ users, overseeing project planning, requirement gathering, sprint execution, and UAT coordination.
- Developed PRD, BRD, user stories, acceptance criteria, and AS-IS/TO-BE business process flows to align stakeholders on scope, risks, and priorities.
- Conducted business analysis, validated requirements with operational teams, and collaborated with developers, QA, and designers under Agile Scrum.
- Monitored progress through Jira (backlog, sprint board) and facilitated iterative testing to improve usability and system performance.
- Delivered measurable improvements in process efficiency, reflected in faster task completion and improved platform adoption.

- Collaborated with management to design and schedule content themes in alignment with organizational goals.
- Produced captivating visual content and conducted performance reviews to optimize content strategy based on engagement metrics.

- Conducted user research and analysis to inform product strategy, including creating user journey maps and flows to optimize UX decisions.
- Produced user journey maps, UML diagrams, and low-fidelity wireframes to guide solution design.
- Collaborated with cross-functional teams to ensure alignment between user needs, business objectives, and technical feasibility.

- Designed, tested, and maintained modular web applications to support timely project delivery.
- Applied object-oriented programming to ensure scalability and maintainability.
- Collaborated with teams to resolve software issues efficiently, improving project outcomes.
